

To Whom It May Concern; I am A Truck Driver who utilizes the programming that XM satellite radio provides. Since purchasing my system it has become more enjoyable for me as a driver,because now Instead of searching for channels as I'm driving through the country,I can now listen to a single channel throughout the US. Among the many programs that Xm offers the exclusive traffic/weather channels are a boon to the driver in providing information so you can do your job in a fluent and efficient manner. Just because no other programing like this is available shouldn't mean XM shouldn't be allowed to do it. We pay for our premium service and since we do "PAY" for our service. We deserve to get the best programming we currently get for the price we pay for it. If what they did as a program provider wasn't what I wanted I wouldn't use the Services they provide. But since getting my system I am "HAPPY" I did what I did. And whomever the person(s) that have a problem with what XM provides their subscribers should get off their "High Horse/Soap Box" and get a life and leave our XM alone. Please reject NAB's petition 04-160 since all they wish to do is put a stranglehold on the services I enjoy.
